Date	Wednesday, June 29, 2016
Time	09.00 to 13.30 (with Networking Lunch)
Venue	Vivanta by Taj, MG Road, Bengaluru.

"Making chip test available for everyone"
The New Shape of Testing CloudTesting™ Service (CTS) is an Industry First, On-Demand Testing Service

Semiconductors landscape is always evolving. Engineers doing IC development struggle to get precious time slots on testers to debug their devices. And in R&D, efficiency suffers when several engineers must share a single tester. Meanwhile, design houses, university labs and research institutes wanted to evaluate their devices on semiconductor testers, but could not afford the outlay for a standard tester, or lacked the specialized knowhow to operate one.

CloudTesting™ Service leverages recent advances in cloud computing that have transformed the concept of ownership from physical possession of an asset to a licensing agreement, with the asset itself residing in the cloud. Applying this paradigm to semiconductor test, a new business model was developed that expands customer access to testers by delivering test IP directly to their personal computers.

This revolutionary concept of a tester in every lab defines our mission to create the new shape of testing a mission driven by our passion to solve customer issues with innovative products and services, contributing to the further development of the semiconductor industry.

Agenda

09.00 – 09.30 hrs : Registration
09.30 – 09.45 hrs : Welcome Address by IESA & Advantest
09.45 – 10.15 hrs : Advantest Introduction and technology
10.15 – 10.45 hrs : CTS Introduction
10.45 – 11.00 hrs : Coffee/Tea Break
11.00 – 11.30 hrs : CTS Application
11.30 – 12.30 hrs : Product Demonstration (Breakout session)
12.30 – 13.00 hrs : Interactive discussion with leaders from ESDM industry & Speakers
13.00 hrs onwards : Networking Lunch
